1. Claim 8 is objected to because of the following informalities: line 3, the phrase "the material" has no antecedent basis. Appropriate correction is required.

2. Claims 1, 2, 6-8, 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 4, claim 14, line 5, the phrase "metal matrix composite" is unclear as to what is it meant. Is it being referred to a compound of a metal?

Since claims 1 and 14 disclose the reflector layer can be made of a metal matrix composite, it is unclear what is the relationship between a coefficient of thermal expansion of a material of the reflector layer and a coefficient of thermal expansion of a material of the electrically insulating substrate layer if the reflector layer is made of a metal matrix composite.

3. Applicant's arguments with respect to claims 1, 2, 6-8 and 14-15 have been considered but are moot in view of the new ground(s) of rejection.
